Doby Green Gasket Factsheet

**DID
YOU
KNOW
?**

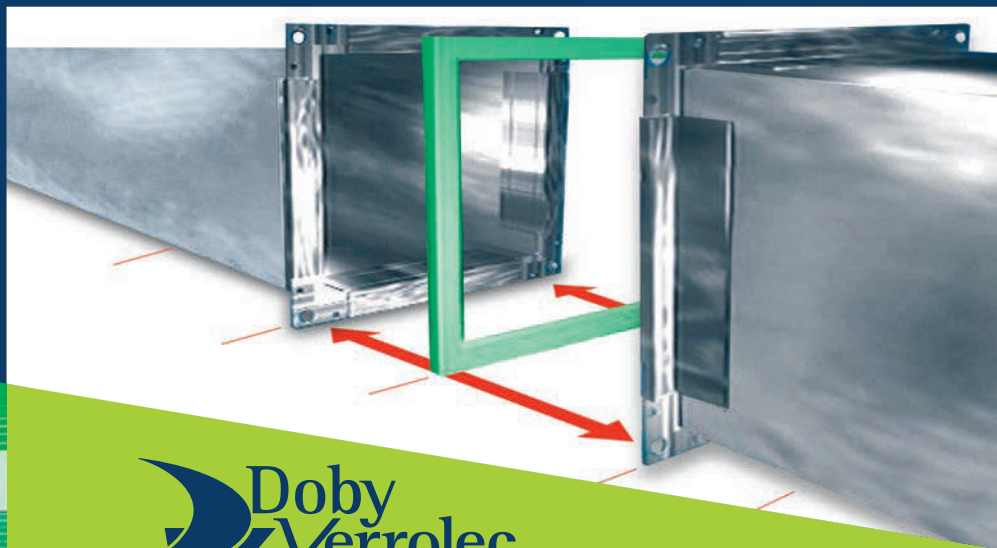

Facts about our Green Gasket...

- Needs a minimum of just 30% compression to give an effective water seal.
- Has a service temperature range of -30°C to +70°C.
- Life expectancy in excess of an incredible 20 years.
- Replaces Chloroprene foam seals.
- Has a good resistance to dilute acids and alkalis.
- Distinctive green colour.

DVL Green gasket (572) is 14.95 mm wide and 4.58 mm thick with a PVC foam material. Backing paper is on the opposite side of the adhesive and easily peeled off once gasket is applied to the duct.
