?**

'S' Type Stiffener Profile

- Enables cost savings over traditional RSA stiffening.
- With the 275 g/m² Galvanised coating, eliminating the need for painting.
- Profile is easier to cut compared to using Rolled Steel Angle.
- Pre-punched Profile negates the need for drilling pilot holes.
- Stiffener Corner pieces can speed up fabrication, improving both safety and appearance.
- Available in 4 sizes with a rating up to S5 Medium pressure, the highest rated stiffener profile available.
